PLEASE READ AND REVIEW THESE IMPORTANT TERMS

When deciding on proper turns for your trophies, remember you are the animal hanging on the wall. If you are looking left, that would be a left turn, looking to the right would be a right turn, and straight would be looking forward with no turn.

Take time to decide the best location where you will be viewing your trophies. Make the proper decisions on turns and also consider how they will be hanging on the wall to allow enough room. If spacing is becoming an issue, consider a pedestal on some mounts as an option or contact us for other ideas.

Please take time to review your door height & width along with any other issues outside the house that could present a problem in getting the mounts through the door that will be used. This is especially important for full body mounts and pedestals. If there is a concern, let us know the size of the opening before your mounts are done!

Also take time to look at your ceiling heights and hallways, steps, and any other areas in the house that could present a problem in getting your trophies to their desired location. It is much easier to solve any problems long before the work is completed. In most cases almost all shoulder mounts will fit through a standard door.

We do trophy room design and can arrange for delivery of your trophies.
